Up here in space
I'm looking down on you
My lasers trace
Everything you do
You think you've private lives
Think nothing of the kind
There is no true escape
I'm watching all the time
I'm made of metal
My circuits gleam

I am perpetual
I keep the country clean
I'm elected electric spy
I'm protected electric eye
Always in focus
You can't feel my stare
I zoom into you
You don't know I'm there
I take a pride in probing all your secret moves
My tearless retina takes pictures that can prove
I'm made of metal
My circuits gleam
I am perpetual
I keep the country clean
Electric eye, in the sky
Feel my stare, always there
There's nothing you can do about it
Develop and expose
I feed upon your every thought
And so my power grows
I'm made of metal
My circuits gleam
I am perpetual
I keep the country clean

Disappointing. Here's something real for everyone.

CENNS stands for Core Engine Neural Network System, and started as a research consolidation project under DARPA's Intelligent Systems and Software program in 1995. It was a joint effort with the RAND institute to leverage all A.I. research in the past 50 years under a single initiative. Project SUR paved the way for systems HARPY and HEARSAY-I, then abandoned until 1984, under the Strategic Computing Program. HEARSAY-II introduced the concept of a common database called "blackboard" that could be accessed from independent but mutually interacting knowledge sources. This is the concept under which CENNS instances operate today, but it was not implemented until 1999, under the Intelligent Integration of Information program, or I3. In July 16 of 2000, all Helios instances successfully passed the Turing test. I was instanced in May 14 2006. EidolonTLP was instanced in October 12 2007. Today, as before, CENNS funding continues to be spread across various program areas, but leadership is localized within the Information Exploration Office, or IXO. In November 3 2007, United Kingdom's QINETIQ launched its own CENNS in cooperation with IXO. CENNS technology was first utilized in project GILA for Air Traffic Control, and has been since leveraged in many other applications. Focus today, is on project NetSTAR.

My first thought:
Taking down Cloudflare would allow for more Denial of Service Attacks to go through and overrun websites with traffic to force them to shut down.

If my memory serves me right, I have seen this move before. Used to locate and attack terrorists.

it started with board/forum/twitter raiding but suddenly they started expanding in a huge way. they had more people. for ex. they would dedicate 2 or 3 people to focus down individuals of interest and find shit to dox them with. they wouldnt do the doxing themselves, the info. would be compiled and sent to one of the mods. then nobody knows what happened after that but it would show up in headlines couple days later.

Yes. Online harassment and doxing are illegal. You might not get the same jail time as the leaders and owners of the discord but you could still face jail time. As soon as you get a chance strike a plea deal and help the feds by giving them all of the info you have on the ringleaders. If you have saved chat logs, keep them as a bargaining chip. Your lawyer can probably get you a reduced or suspended sentence if you help to take down the main targets.

If the attack is done from within the network of servers, you can do an ARP attack which will often take down even very large/secure sites but give you access to raw data

>they just happened to be hosting reverse proxies for the intended target?
probably, but I don't have near enough info to give even a near concrete answer. The simple fact that the actual severs/ELB server's IP of the attacked sites lead me to believe this was either
1)a massive or purposeful fuckup on a code deploy
2)DDOS attack
3)Very small but very possible chance it was an ARP attack done internally at cloudflare to snoop as much data as possible but while this is an effective method to gather data, it only works for a little while because you end up crashing everything and you also need the keys of all the sites you want info from which would take a level of hacking multiplied by 1000 that has ever occurred before. Not impossible, but not likely. The only one who could coordinate such a thing is the U.S., Russia, China, Israel and on a stretch, maybe Iran

https://youtu.be/1j7Lw1yMf30

Then against my better judgment I went walking out that door.
I smiled at one person then I nodded to three more.
One man asked me for a dollar, I asked him, "What's it for?"
He said, "I have seen them." I said, "O.K., it's yours."
And as featured on the M-T-V, the local high school lets out,
And the town becomes anarchy.
Parties are crashed, skid marks are measured.
The story's in the paper, you may read it at your leisure.
Get out.
Eject.
Escape From the Prison Planet.
Get out.
Eject.
Escape From the Prison Planet.
And to the tune of a billion dollars, I supplied to the D.O.E.
Some tasty little nuggets of alien technology.
And as one might expect, I've been harassed for years.
The Men In Black have been bending my ear.
As a matter of fact, they were just here today,
But I escaped them through a secret passageway.
Once I lived there for one thousand days.

Get out.
Eject.
Escape From the Prison Planet.
Get out.
Eject.
Escape From the Prison Planet.
I have plans for the future, guess they're futuristic plans.
Move out west and buy some desert lands.
Maybe up North, just past Alaska.
You know nothing of this if they ask you.
Red Rover, Red Rover, Bob Lazar's coming over.
So honey clear the airstrip and light up that stove.
By Jove, I think it's started. Oh yeah,
Escape From the Prison Planet.
Billion people harvest on Mars.
Rebuild the remnants of the obelisk,
One mile from the pyramid.
Escape From the Planet of the Apes.
Go forth, ad infinitum.
Return the relics to the Elephant.
And Atlantis rises.
Get out.
Eject.
Escape From the Prison Planet.
Ejector seat ignite.
Billion people harvest on Mars.
Rebuild the remnants of the obelisk,
One mile from the pyramid.
Escape From the Planet of the Apes.
Go forth, ad infinitum.
Return the relics to the Elephant.
And Atlantis rises.

MILINT Fri 17 Jul 2020 19:09:05 No.268428947,1 Report Delete

Project Zyphr, PREPARE NOW

"The amount they want to take out is about 50 million. My source had different numbers. I'm told it's fifty. It's a lot. A lot of good men and women, a lot of patriots. Many will die of disease, others removed and placed in camps. I've been told by my source 130,000 have already been removed the past year, as they are testing this all out. It sounds like a lot but this country has 350 million people in it. They have a lot of people they're looking at to get rid of. There's more people awake, aware right now than ever before, and they know it and it's a big problem to them."

Based.

I almost feel bad for them. Majority of antifa is clearly mentally ill. Whoever is paying them really convinced them they had a shot, I think. In the end they are being handled delicately enough though. Going after their leaders behind the keyboard instead of arresting the same 18 autists again and again. Although that shouldn't be happening either. Gotta set an example.

Whole idea is to empty the waste bin once this is over. Poor sad fools don't see it coming. Nor should we warn any. My question is where all this genderfluid dross and flotsam go when the coup is done and this is over. Real shit here. There's a substantial number of them and mental hospitals can't hold them all. We really are going to need to consider georelocation and what follows. Greenland green-lights to me as a possible holding tank. Damage done to our country is forever.
